

บริษัทหลักทรัพย์ บัวหลวง จำกัด (มหาชน)
BUALUANG SECURITIES PUBLIC COMPANY LIMITED

ANNOUNCEMENT

Enhancement of the Collateral Monitoring System Prior to the Submission of Futures Trading Orders

Bualuang Securities Public Company Limited (“the Company”) hereby informs you of an enhancement to its collateral monitoring system to comply with the Futures Business Operating Standards issued by the Futures Industry Club under the Association of Thai Securities Companies (ASCO) and to ensure the security and effective risk management of your derivatives trading account.

The Company will improve its Excess Equity verification system to ensure that your account has sufficient collateral for each transaction (including commission and VAT) before any order is submitted via the SETTRADE Streaming system. This enhancement is designed to prevent situations in which insufficient collateral may arise after a position has been closed and will apply in the following cases:

1. Closing positions on both sides within the same contract series (Gross Position).
2. Closing positions in the same underlying product but across different contract series (Spread).

This Announcement shall be effective from 15 February 2026, onwards.

Announced on 16 January 2026

Bualuang Securities Public Company Limited

(Mr. Pichet Sithi-Amnuai)

President
